ABSTRACT

Dear readers and invited chairs and speakers of the Padua Days on Muscle and Mobility Medicine (2025 Pdm3) which will be held from 25 to 29 March at the Terme Euganee, Padua, Italy. Thank you again for your continued interest in the Padua Muscle Days, an international meeting organized at the personal invitation of old friends and their young brilliant students. A preliminary program is included listing all speakers announced to date (confirmed or not). Please check the Sessions and send me the missing information (missing speakers, working titles with full addresses and additional speakers). I hope you will take the time to spread this appeal among your senior colleagues and their brilliant young alumni. The time has indeed come to send presentation proposals and registration/accommodation forms to participate in the International Meeting: Padua Days on Muscle and Mobility Medicine, which will be held at the Hotel Petrarca of Euganean Thermae (Padua, Italy) from 25 to March 29, 2025 (2025Pdm3), but spending Wednesday March 26, 2025 at the Villa Pollini on the Euganean Hills (Padua, Italy).

Keywords: 2025 Padua days on muscle and mobility medicine, Italy, Tentative program, Call for oral presentations

Abbreviations: 2025Pdm3: Padua days on muscles and mobility medicine to be held 25 to 29 March 2025; EJTM: European Journal of Translational Myology; ncRNAs: Non-Coding RNA; Pdm3: Padua Days on Muscle and Mobility Medicine; RNA: Ribonucleic acid

In a recent historic review, Sabbadini [1] recalls his years spent as a guest scientist at the Institute of General Pathology of the University of Padua, Italy and the many years he spent valorizing a serendipitous observation made in collaboration with the scientific group of Professor Giovanni Salviati, University of Padua, Italy. The main result of those years is the addition of “Bioactive Lipids” to the long list of Myokines, Adipokines, RNAkines (ncRNAs), that are collectively known as cytokines. Readers of this editorial are therefore warmly invited to contribute typescripts to MUSCLES (MDPI) on Bioactive Lipids and cytokines, specifically Myokines. I am confident that young readers will be motivated to test in vitro and in vivo this further option for drug development on how to rejuvenate at 80’s [2]. A second easier goal for them is to accept invitation to the 2025 Padua Days on Muscle and Mobility Medicine. Indeed, it is time to send presentation proposals and

registration/accommodation forms to participate in the International Meeting: Padua Days on Muscle and Mobility Medicine which will be held at the Hotel Petrarca of the Euganean Thermae (Padua, Italy) from 25 to 29 March 2025 (2025Pdm3). A preliminary Program for the Call for Presentations, the information on how to join the 2025Pdm3, the Abstract’s template and the

Registration/Accommodation forms follow as Supplementary Materials. Abstracts of accepted presentations must be submitted by January 15, 2025 along with payments for registration and accommodation. The preliminary Program ensures that the 2025Pdm3 will be even more successful than previous successful events [3-10].
