The time passed quickly for Samour, as he spent an entire night tirelessly, reassuring the citizens at one time and implementing the procedures followed at another time, until he dawned the next day with the completion of room number forty, to return to his home to take a rest.

On the other hand, Dr. Ola Sarhan, 27, a recently graduated dentist, was watching the instructions directed to volunteer doctors on her way to the syndicate via the live broadcast of the union's page, and without her family's knowledge she joined the volunteers as the first female doctor who joined quarry examination teams inside hotels.

Ola tells Al Jazeera Net that she did not tell her family at first, as she knows their prior refusal to do this humanitarian work because of their fears over her, but they accepted the matter later, as she explained.

Ola was touring with the coordinator of the Emergency Committee of the Dental Association, Dr. Ayham Al-Momani, inside hotels to exchange shifts and inspecting the requirements of volunteer doctors, as she took charge of coordination between the volunteers since the development of the Corona crisis in Jordan.

The next day, Sammour went to the Dental Association and was provided with N95 type masks with 250 masks for each doctor, to distribute them to hotels in the Shmeisani and Jabal Amman region, in order to protect any person on the field from security men, homeland workers and cadres inside the hotels. And Jordan has established the National Center for Security and Crisis Management.

CONCLUSION

The governmental measures that it has taken to deal with the new Corona are aimed at the safety of citizens

As confirmed by the crisis cell regarding the virus, and through the statement of the Minister of State for Information Affairs, Amjad Al-Adayleh and Dr. Saad Jaber, the creator, in taking measures and decisions regarding the scourge facing the world from the scourge of corona, which has worsened in most countries of the world, including the beloved Jordan, I am very confident that the Jordanian people Facing this scourge seriously and diligently and with confidence and that the measures taken by the government since the beginning of the crisis today and that Jordan successfully connected its strategic plan to deal with the new Corona virus, aims to protect the homeland and preserve the safety of citizens, and reduce the opportunities for the spread of the virus as much as Nowhere. The Jordanian people had a great role with their king and government to overcome this scourge that invaded the world until the beloved Jordan today reached zero levels in injuries. This is due to the national efforts represented by His Majesty the King, the government and the conscious Jordanian people who proved to be a civilized people by raising the head of every Jordanian in front of the whole world.

Jordan, God willing, has become the first country in the world to recover from this global epidemic, and therefore I congratulate all Jordanians on this result, which would not have been reached had it not been for the efforts of the king, the government, the crisis of the cell and the people, through its true commitment to defense decisions that centered on Defense 1-6, which first Jordan today to a state Zero injuries, and the Minister of Health, Dr. Saad Jaber, had a pivotal role in reaching this impressive result towards the country and the world at large.

Today, corresponding to 4/10/2020, the deaths exceeded 95 thousand.

Those who accuse Jordan and Jordanians of not being credible in this matter intend to demoralize Jordan and Jordanians. For my role as a Jordanian citizen, I lived the virus from its beginning to today, I thank the respected Jordanian government and people, who have proven their existence and citizenship through their commitment to the decisions issued by the government and the defense decisions that brought us to this very comfortable situation for the homeland and the citizen, and I hope that life will return to whatever it was after the crisis, as God Almighty said.

The Almighty saying in Surat Al-Isra (And we descend from the Qur'an what is healing and mercy for the believers, and the unjust do not increase but a loss).

See my dear reader, what happened in Italy, Germany and America when they returned to the Qur'an and what was reported about the verses of God Almighty to survive the epidemic, but God does not heal a people who does not believe in his book and the Sunnah of his prophet.

And as God said in Surat al-Tawbah and al-Israa (and the breasts of faithful people will be healed) (Tawbah / 14).

(And download from the Qur'an what is healing and mercy for the believers) Al-Isra / 82.

(Say: It is to those who believe in righteousness and healing). Chapter 44.

The Almighty saying: "O people, a sermon has come to you from your Lord, and a cure for what is in the breasts, and guidance and mercy for the believers." Yunus: 57.

He says: If we made the Koran to Oagamaa said Lula was separated and Arabic verses oagama Say is for those who believe guidance and healing and those who do not believe in their ears, which they revere blindness those calling from a place far separated {44}.

By recovery, many people are exposed to many trials, such as affliction with disease or epidemic, such as viruses, including new corona, this affliction, which God raises His glory to the Almighty, the levels of affliction, and patience for the disease has many virtues, which include expiation for the sins and sins that a person may commit.

One of the supplications that we must follow:

There is no deity but God, the Wise, the Generous, there is no deity but God, the Highest, the Great, there is no deity but God, Lord of the Seven Heavens and Lord of the Great Throne, there is no deity but God, He alone has no partner, He has the King and He is praise and He is above all capable. And also

Oh God, there is no refuge and no escape from you except to you. You are capable of everything. My Lord, I have touched the harm and you are the most merciful.

I hope from God to recover from this epidemic that God is merciful.

RECOMMENDATIONS

Recommendations that the researcher sees as it was followed in Jordan

The researcher recommends the following:

- To prevent all mass gatherings at the present time.
- Closing land and air outlets in the face of arrivals from the countries of the epidemic.
- The Pharmacists Syndicate has a responsibility to control masks prices.
- The Ministry of Immigration should take all necessary precautions to prevent the spread of the epidemic.
- The necessity for all ministries and state agencies to abide by the technical decisions issued by the Central Crisis Cell to confront the emerging corona virus and defense decisions.
- Full compliance of all citizens with recommendations on preventive measures and absolute cooperation with procedures of Ministry of Health teams deployed at border crossings.
- Compliance fully with the Ministry of Finance with all the recommendations of the Council of Ministers and work immediately to provide private funds for the work of the Ministry of Health and its departments to enable it to carry out its duties.
- Urging local governments and subsidiary operating rooms to work with all care and earnestness under the umbrella of the Central Crisis Cell at the Ministry of Health.
- All media outlets must carry out their duties in spreading health awareness and in coordination with the Public Health Department in the Ministry of Health.
- Effective communication of the Ministry of Health and other relevant ministries with the WHO branch in Jordan and full compliance with the regulations issued by it.
